Standard-Setting Experts

Understanding the SROI of #Youth4Peace

Using social return on investment (SROI) approach to understand, measure and quantify the impact of peacebuilding interventions

Traditional Evaluation vs. SROI

$$\text{SROI} = \frac{\text{[Total present value of impact]}}{\text{[Total investment]}}$$

Overview of SROI Methodology

Understanding what the program does

Understanding who is affected by the program

Understanding how they are affected by the program

Valuing the importance of these effects

Validating the findings with those who have experienced the program's effects

Findings are shared and results are used to improve future programming

Did SROI Change in Context of Elections?

YES!

i.e., Up to \$32.54 for
every \$1*

*These results are only suggestive,
not complete analyses

Added Value of SROI in Evaluation

1. Encourages decision-making based on value, not outputs
2. Prioritizes the voice of all key stakeholders and what matters most to them
3. Provides insights to avoid or mitigate harmful effects
4. Examines sustainability
5. Elucidates value for money

Key Benefits of SROI for Funders/Investors & Program Managers

- Identifying what matters most to stakeholders
- Identifying strengths and opportunities of programming to grow value
- Accounting for value creation over time
- Local communities empowered to define impact, more ownership

Next Steps

1. Integrating SROI Results into National Policy-Making and Action Plans
1. SROI Evidence-Based Results to Drive Funding Priorities

Q&A

Key Partner Reflections

SROI + The Peace Impact Framework

We will have a coherent way to understand impact, speak across organizations and share knowledge and learning about this sector more widely.

We will understand more about the right investments in peace.

- With a much larger set of data aligned across basic language, we will be able to set priorities in line with a much broader evidence base.

People living in conflict will take part in setting the priorities.

- The data we use and indicators will be relevant to the people we aim to serve, and where we want to make the greatest change.

Impact will be the priority.

- Evidence can be built across projects and over long-term timelines for more valid and reliable assessments of impact on peace.
